

Chipunga, 18.09.2014

Dear Grace members,

My name is Lovewell Mkandawire and i am 22 years old. I am the oldest son of the headmaster of Chipunga Primary school. I grew up and went to school in this area. Since one year after i finished my secondary school i am only at home. I really would like to go college and continue my education but my father cant afford the school fees. Thats why i want to ask you people from germany for help.

I choose to be a teacher to help my community. In my future i want to stay where i grew up and help developing my area. I promise to be a good student and work hard after that. I went to the college where i want to go and they said that i can start this year when grace says that they pay school fees for me. Even if the school year already started and my fellow students already studying.

I am ready to pay for every term 25% of the total school fees. After finishing my school i want to work for free at chipunga primary school before i get posted by the government. In the school holidays i want to help CDC and work hand in hand with the volunteers. Please dear grace members and friends of chipunga help me with my future.

Best regards

Lovewell Mkandawire
