

CDC - Meeting 14.12.2017

Agenda:

- 1) Tertiary Education
- 2) Loan skim of fertilizer and maize seed
- 3) Primary school issues
- 4) Preschool issues
- 5) CDC tasks when the farm is sold.

① The CDC has discussed about the appliances of Kenson Msiska and Kelvin Msiska to get financial support. CDC decided ~~two~~ take Kelvin Msiska because his appliance firstly sounds very good, secondly, he was already supported by Grace and thirdly he gave a fee break-down. He also has good results in his first studies.

② How should we do the interview with Kelvin?

② Every worker of the farm will pay back ~~until~~ the whole amount till kind of December.

We have already some amount of the maize seed: It's MWK 66,500, paid by 19 workers. *

③ CDC identified lots of problems:

a) Only one cook is coming, but GRACE is paying for two cooks → Michael will ask for the names.

b) There are not enough teachers. The child many children don't have exercises to do. They just run around and nobody from the community takes care of them. The certificated members of the community have to look after the children.

CDC will arrange a meeting where the community, the CDC members and the teachers should take part. The meeting will be on 12th of January.

④ The members of CDC said, it's good to increase the wages for the educators.

Reasons: - The educators are always coming to educate the learners.

- Everybody is paying the pre-school-fees

Attitude: "Everything is just fine at the pre-school."

↳ and the other CDC-Members

*

CDC is giving the primary teachers a last chance to pay back the amount for the fertilizer within 4 months. There should be a contract about this. Michael and Daniel will manage this.

* The contract will contain: If they fail, there will be no fertilizer next time and they still have to pay back the whole amount.

⑤ It is difficult to say something about the tasks, because CDC has no idea about the plans of the

New farm owner.

How CDC should build a new office outside the farm.
There should be a new house for the volunteers who might come after Michael.

Maybe CDC will be able to focus more on educational topics in the future than on buying fertilizer and maize seeds for the community.

CDC has decided to wait for the new owners.

The meeting started at 12:30 and ended 14:05.

Members who were attending:

Daniel Mthuti ~~Daniel Mthuti~~

Esau Nyasulu E Nyasulu

James Msisika J Msisika

Mzozoto Ngwira Mzozoto

Maria Banda maria.p Banda.

Minutes written by Michael Heikenne on
14 of December.
