**CDC / GRACE: open letter about our commitment and general agreement with the Chipunga region**

To whom it may concern

We are delighted to hear that with support of CDC, Mr. Daniel Mthuti, Mr. Vincent Schnell, and Ms. Antonia Billermark a new school block at Chipunga Primary School had been erected and inaugurated some weeks ago. Further two pre-school buildings were renovated and really nicely furnished. Both projects are a great achievement to the region and could improve and raise education in the near future. Congratulations!

To maintain the new and renovated buildings and to ongoing run the schooling projects self-responsibility and a self-contribution of the local people and community are necessary and are expected by the donors.

To make our projects a winner and to continue with our efforts in the region we strongly advice **to involve Chipunga Development Committee (CDC)** under its **nominated chair Mr. Daniel Mthuti at any time and concerning any issue**. What we don't want and what should be avoided of is an uncultivated discussion and pinning the blame on others.

CDC, Mr. Daniel Mthuti respectively, Mr. Vincent Schnell, and Ms. Antonia Billermark are doing a wonderful job and run approved projects according to the statutes of GRACE and furthermore propose new projects. For this help and their on-site management we are deeply indebted. Please be aware any of their doings are triggered by a responsibility against us and we believe they are awfully eager to run our projects proper.

May we beg the community, headmaster, school committee, VDC, and other local groups to fully respect and to speak open with Chipunga Development Committee and its chairman?

Thanks for bearing in mind our principles and we remain with best wishes.  
On behalf of the German GRACE Managing Committee,

Dr. Jens Diedrich  
President GRACE charity
