Dear Sir,

### **Fertilizer required urgently**

Thanks for the reply of our letter of may 2012, which was written on 1<sup>st</sup> June 2012. In this letter, I have one urgent project that I want to talk through writing. This is fertilizer, as I have mentioned above.

People they have started to pay in advance, so that when we buy fertilizer other people they will have to pay much money. We need money this month, because we want to buy fertilizer this month of June. This is due to the devaluation of the Malawian Kwacha and it will be devaluated again any time. Last month the exchange rate was one dollar to 250 Kwacha. But now it is one dollar to 267.48 Kwacha.

For the type of fertilizer its all the same like the past. 30 bags one type and 30 bags for other types which comes to the total number of 60 bags. For this two types it depends with quality and price that someone needs.

I have focused on fertilizer only. This is because some of the questions that is in this letter it needs to discuss in a community level. So on Monday 18<sup>th</sup> June I will have a meeting with the various Commitees in the Community. After the meeting, I hope that what so ever we will discuss the result will be positive and successful is when I will answer the questions step by step. Some points concerning the farm workers we have already had a meeting and discussed. That's why I said some workers have started paying money for fertilizer and other proposed things in advance.

With thanks

Daniel Mthuti
